

HIGH VIS. ONLINE

about

In her work Jivan van der Ende researches expression of gender identity, objectification and commodification of the working body in capitalist, patriarchal society. Through collaboration, cross dressing and the exploration of the camp side of things, she discusses the way we look at bodies with queer peers and the Workie community, a fetish community that is dedicated to the workwear uniform and its wearers. In her work as High Vis. Online she translates her research into the creation of fetish gear, merch, print works and fanzines.
